
FINCOMPANY S.R.O.

Fincompany s.r.o. is a small payment institution operating in the Czech Republic, CNB Reg. No. 03640621. The company has been set up to provide a basic set of payment services for individuals and companies at competitive rates.

It is vital for our business model to keep operating costs low while achieving the highest possible productivity. We understood that goal could only be attained through a high degree of automation, which meant considerable investment in IT at the start of business.

Thanks to our colleagues from EEPS s.r.o., who referred us to Canopus Innovative Technologies, we have learnt about ePay Suite software. ePay Suite has turned out to be an ideal choice for us in terms of functionality and overall costs.

Basically, EPay Suite was ready to run with a set of available interfaces with business critical third party service providers such as SWIFT Alliance Lite 2 and customizations made to meet reporting requirements of the Czech National Bank. Its in-built workflow engine has enabled us to reach the expected STP levels and rationalize processes.

When we made our purchasing decision, we had no doubt about which solution to choose, knowing that ePay Suite had been fully tested in the field by EEPS.

Kind regards,
Alena Sharykava
